

Freshworks customer service battlecards

1. Zendesk
2. Oracle RightNow
3. Salesforce Servicecloud
4. Servicenow
5. SAP

List of customer service persona battlecards for MM

1. Zendesk Rip & Replace (Freshdesk Omnichannel Suite is the better choice for MM & Enterprise companies that want to provide the best Omnichannel experience to customers, a more future-proof solution (with Freddy AI to boost agent productivity, flexible automations, natively-built FSM) that works out-of-the-box with no dependency on developers or SIs)
2. Oracle Service Cloud Rip & Replace (Freshdesk Omnichannel Suite is the better choice for companies that want a seamless agent and customer experience besides flexibility in integrations)
3. Salesforce Service Cloud Rip & Replace
4. Servicenow Rip & Replace
5. Microsoft Dynamics 365 Rip & Replace

[Important information] reg product names and logos

As all our customer service products are going to be rebranded with new product names and logos from 09 Aug 2021 all mentions of the old product names have been updated with the new ones.

Here's what we changed:

Freshdesk Omnichannel	→	 Freshdesk Omnichannel Suite
 freshdesk	→	 Freshdesk Support Desk
 freshchat	→	 Freshdesk Messaging
 freshcaller	→	 Freshdesk Contact Center
 freshsuccess	→	 Freshdesk Customer Success

Battlecard zendesk

Discovery Questions

Corporate Strategy

- Zendesk announced its acquisition of Survey Monkey and its pivot into customer intelligence. How does this align with your objectives?

Capabilities:

- What is the time spent by your agents on L1 queries and what opportunities do you think are available to reduce L1 issues?
- Do you currently use apps/integrations to supplement Zendesk?
- Do you get reports of all your support channels at one place?

Scalability:

- How often do you feel that you have to adjust Zendesk's automations and workflow settings and how much time does this take?
- How often have you experienced challenges setting up automations & workflows?

Pricing:

- Do you allocate a sizeable budget for migration/ implementation and resources for building apps?
- Does your running cost increase every year?

Audience

Identifying Rip & Replace Accounts:

- Evaluating Freshdesk and Zendesk as CX solution
- On Zendesk now, but unhappy with the partnership and support
- Annual renewal coming up

Persona: Budget Holder or Executive

Segment: Mid Market (250+) and Enterprise

Region: Global

Customer wins against Zendesk

Exterro (NA; 100+ Agents) Chat & desk integration, round robin ticketing, integration with 3rd party apps, better AI strategy

Siteimprove (NA, 60 Agents) partnership model, better omnichannel cx

Zooplus (EMEA; 500+ Agents) Seamless Freshdesk Support Desk, Freshdesk Contact Center integrations, competitive pricing, multilingual, and multi-product support.

Zalora: (Asia; 400+ Agents): Single Freshdesk instance to support all customers across 7 brands and 10 countries. Freddy AI automated their transactional tasks, and automatic ticket assignment improving efficiency.

Zendesk challenges

- **Ease of use challenges** - system is not intuitive and it's difficult to navigate, requiring a higher learning curve, higher risk in system management, and cumbersome operational complexities (ex: no easy way to associate business hours with different groups of agents)
- **Limited out-of-the-box features** - limited native features, requiring third-party apps, which increases costs and operational complexities with managing multiple vendors (ex: round robin ticket assignment isn't native)
- Bots are **limited question/answer bots**. They **do not learn over time**. Advanced bots available through costly 3rd parties and create integration challenges.
- **Less control** for admins and agents who integrate multiple products, with no centralized control over the different channels; ex: no centralized control to set thresholds for phone, chat, email, business hours
- **Zendesk was designed as a reactive system**, so it does poor job of proactive/outbound messaging; for example fewer outbound capabilities, such as mass email sends, messages
- Zendesk's suite bundles are **expensive** and are not reflective of their customer-first stated approach. Some critical features that enable better support are left as expensive and optional add-ons

Zendesk FUD against us

- Zendesk is a recognized global brand

Rebuttal: Freshworks is the only player in Gartner's Visionary quadrant with innovations around our AI, 360 approach and app marketplace. Gartner says, "Midsize & enterprise organizations focusing on innovation for customer engagements and looking for a customer-for-life vision consider Freshworks."

- Zendesk has advanced integrations for enterprise use cases

Rebuttal: Freshworks is sponsoring open, free integrations that we will own. Ex: bring your own telephony and other areas coming in 2022

- Freshdesk isn't scalable

Rebuttal: Freshworks is ranked #1 in the Gartner Peer insights as customer's choice. We've been rated the highest when it comes to quality of technical support and timeliness.

- Our data is too large to migrate to Freshdesk

Rebuttal: Freshdesk has a track record of migrating business in less than 4 weeks. We onboarded Sling who switched from SFDC with over 6,500+ agents. We migrated 2.6M contacts, 1M tickets; ensured their SEO (KB) was not impacted.

Why we win

- **Out-of-the-box solutions:** Starting from ticket assignment, automation, reporting and a sandbox, Freshdesk makes it easier for an admin to set-up and scale. Agents save about 1.2 hours in menial tasks and reduce response times by an hour. In Zendesk, the above features are cumbersome and often cost extra.
- Freddy AI is our easily consumable AI that helps companies of any size improve agent efficiency and deliver delight. It is **easy to configure, deploy and maintain** without depending on developers or third-party solutions. Provides direct answers, not article recommendations.
- Admins have **complete control over the entire ticket lifecycle** as well as a collaborative ticket structure. Freshdesk offers shared ticket ownership, parent-child tickets, and integrations to our whole product suite for fast collaborations.
- Freshworks' platform is **built on AWS lambda**. With serverless architecture, businesses **spend 25% less on building apps**.
- **Our product suite:** A company can grow with Freshworks as we offer market-leading solutions across CX, ITSM, marketing, sales and HR.
- **Pricing advantage:** Native price savings, no hidden costs, more available out-of-the-box (fewer third-party apps)

Proof Points

- Compared to Zendesk, agents on Freshdesk get up to speed 3x faster and make 121 less clicks per day using features like thank you detector, summary app, quick actions etc.
- Response time to customers is reduced by 55 minutes with features like agent-assist bot, in-app notification, auto-refresh on the ticket view page.
- Our bots are excellent for companies of all sizes looking to get into the AI game. They routinely deflect from 40-80% queries for customers (Grofers, Cred, PhonePe, etc.) Freddy was built and deployed to perform COVID-19 screening for multiple hospital and governments in less than a week.
- With our multi-level logical operators, customers can easily automate complex workflows with a single rule. You'll need approximately 35% fewer rules than with Zendesk.

Discovery questions

Omnichannel: How are you managing multiple channels? Do you get consolidated reports, CSAT, incoming call/chat/email volumes?

Agent productivity:

- What is the volume of L1 support queries and the time taken to resolve them? What's the time spent by your agents on redundant tasks like searching for customer information? How are you planning to eliminate this?
- How long does it take for a new agent to onboard and get upto speed? What are the costs incurred?

Workflows & customizations:

- Are you underutilizing your software due to its incomprehensible setup?
- Do you rely on external product experts to curate reports, customise your workflows?

Pricing: Are you paying a heavy premium for dedicated support and consultant fee whenever you need to make changes to your workflows?

Audience

Identifying Oracle Rip & Replace Accounts:

- Stuck with isolated software that's non-intuitive and need dedicated personnel to run the software smoothly, looking out for a self-reliant, future-proof solution
- Frustrated with unresponsive customer support and consultant costs
- Complex pricing system and/or annual renewal coming up.

Persona: Budget Holder or Executive

Segment: Mid-market (501+)

Customer wins against Oracle

Skechers: Skechers manage their entire e-commerce business in the NA region with Freshdesk. We quickly rolled out support to customers in 12 new countries.

Trainline: Seamless omnichannel support & ticket deflection capabilities with Freshdesk Support Desk, Freshdesk Messaging, Freddy AI

Clopay: Unified experience with data flowing between customer service and CRM tools

Stubhub: Freddy powered self-service, agent-assist, multiple channel integrations(Whatsapp, WeChat, Apple Business)

Oracle Service Cloud challenges

- **Hefty price tag for customer engagement:** High licensing fees & complex pricing structure. Basic features like Knowledge Base searches, Chat, Outbound emails, video calls are charged per session. Customers pay in advance in blocks of 100K, 200K to bring down the session cost to .06\$/15 minute session.
- **Disconnected systems:** Building an Omnichannel platform with Oracle is anywhere between hard to impossible, due to lack of product updates, productivity tools and clunkiness. Difficult to link with platforms like Sales Cloud, Engagement Cloud, etc. since it's just a bunch of acquisitions. .
- **Laborious change management** making setup / configurations hard, time-consuming, requires SIs and comes with hidden costs.
- **Outdated technology:** Lack of modern capabilities like real-time conversations, AI, ML, Bots and features leads to more repetitive work for agents denting overall support efficiency. Needs to be installed and updated every quarter and comes with an outdated, non-intuitive interface. Built on .net framework, Oracle operates only on internet explorer and challenging to integrate to open-source implementation
- **Slow time to value, extensive customization, and dev effort with external consultants:** Longer time to setup and onboard/train/ramp up agents. Technical coaching for each feature is separately packaged and charged. Product training is given as a certification that needs to be bought.

Oracle Service Cloud FUD against us

- Our data is too large to migrate to Freshdesk

Rebuttal: We have a track record of completing implementations at a scale that involve 1,000+ agents within 2-4 weeks. We onboarded Sling who switched from SFDC with over 6,500+ agents, migrating 2.6M contacts and 1M tickets.

- Freshdesk cannot scale. Nobody is even been fired for picking Oracle

Rebuttal: Freshdesk is being used by over 28,000 paying customers, 600K agents processing over 6M+ conversations a day. Our enterprise customers include Sling, Netflix, Bridgestone etc.,

Why we win

- **360° approach for your customer engagement:** Natively built Freshworks products that offer better agent and admin experience to manage all channels under one-roof, with powerful Omnichannel capabilities.
- Freddy's no-code chatbots are **easy to build, deploy and maintain. No need for data scientists or consultants.** It can be deployed over multiple channels natively, including but not limited to Whatsapp, WeChat, FB Messenger, etc.
- Freddy can perform multiple actions at the end of a bot flow - **transferring to an agent for live conversations.** Freddy provides a transcript of the bot conversation so that agents have context and begin where the bot left off.
- **Scale and integrate with over 1000+ apps** from Freshworks marketplace. We are the largest user of serverless app infrastructure on AWS, making it secure and scalable for complex use cases and enterprise loads
- **Intuitive and user-friendly UI:** Agents get a consolidated view of customer interaction history from multiple channels in one place avoiding them from toggling between screens and different tools. Enabling them to deliver contextual support, quicker responses and faster resolutions.
- **Fast time-to-value:** Lower TCO, predictable pricing. No need to engage with multiple vendors, available as an integrated solution. Migrate your data to Freshdesk without any hassle. Transparent pricing, straightforward contracts, and free support on all plans

Proof points

- Save 120 clicks and as much as 1.2 hours a day in routine tasks with time-saving features like thank you detector, ticket summary, and quick actions.
- Our bots routinely deflect from 40% & 80% queries for customers (Grofers, Cred, PhonePe, etc.) Freddy was built and deployed to perform COVID-19 screening for multiple hospital and governments in less than a week.
- Agents on Freshdesk get up to speed 3x faster and make 121 less clicks per day using features like thank you detector, summary app, quick actions etc.
- Faster change management via solutions like sandbox auto-sync, assignment rules that save an admin's time in change management

Discovery questions

SFDC Upgrade: How has the upgrade experience been? Have you already transitioned to LEX or are you still on Classic?

Agent productivity:

- What is the volume of L1 support queries and the time taken to resolve them? How are you planning to reduce it?
- How long does it take for a new agent to onboard and get upto speed? What are the costs incurred?

Workflows:

- What 's the time spent by your agents on redundant tasks like searching for customer information? How are you planning to eliminate this?
- Are you underutilizing your software due to its incomprehensible setup?
- Do you rely on external product experts to customise your software?

Pricing: Are you paying a heavy premium for dedicated support and consultant fee whenever you need to make changes to your workflows?

Audience

Identifying Salesforce Rip & Replace Accounts:

- Upgrade to Salesforce Lightning Experience (LEX): SFDC customers still on Classic, looking for a future-proof solution
- Frustrated with unresponsive customer support and consultant costs
- Leadership change can trigger a buying event /switch opportunity
- Complex pricing system and/or annual renewal coming up.

Persona: Budget Holder or Executive

Segment: Mid-market (501+)

Customer wins against Salesforce

Sling TV: 8 weeks to go-live vs Salesforce's 18 months, with 3 million contacts migrated. Resolution time down to 2 mins from 2 hours. Resolution rate increased to 85% from 70% with guided workflows powdered by Freddy AI.

Trimble: Ticket assignment, collaboration, and out-of-the-box reporting. Arkansas Children's Foundation

Outfittery: CSAT, and real-time dashboards. Migrated of 1.5 mn tickets, 2mn contacts, 60k attachments.

Stubhub: Freddy powered self-service, agent-assist, multiple channel integrations(Whatsapp, WeChat, Apple Business)

Salesforce Service Cloud challenges

- **Complicated to setup and maintain:** It takes a village to setup and maintain the tool, including a data scientists and an SI vendor. Despite the heavy resources involved, it comes with multiple points of potential failure.
- **Expensive! Hidden costs and development costs** High licensing fees & complex pricing structure for data storage limits, SIs, add-ons give companies no visibility on cost-to-business. Every workflow change requires a consultant and comes at a cost.
- **Siloed systems:** Mixture of cloud and on-prem solutions leading to data silos and reliance on developers for maintenance. Agents need to switch between multiple screens/apps to find customer information. Omnichannel capabilities consists of a bunch of poorly integrated acquisitions.
- **Broken bots & automations:** Einstein AI trained on disparate data complex automation workflows that are hard to modify lead to repetitive work for agents denting overall support efficiency.
- **Cluttered and Clunky:** Salesforce's interface does not work on all browsers and lacks capabilities like AI, ML. Difficult workarounds, slow load time, lack of global search, insufficient filters dent agent productivity. Even a simple report requires a developer/data scientist.
- **Slow time to value, extensive customization, and dev effort with external consultants:** Longer time to setup and steep learning curve for agents, easy to make mistakes due to its complexity. Product training is given as a certification that needs to be bought. Poor implementation by partners is very common.

Salesforce Service Cloud FUD against us

- Our data is too large to migrate to Freshdesk

Rebuttal: We have a track record of completing implementations at a scale that involve 1,000+ agents within 2-4 weeks. We onboarded Sling who switched from SFDC with over 6,500+ agents, migrating 2.6M contacts and 1M tickets.

- Freshdesk is for SMB, cannot scale and do not have global partners.

Rebuttal: Freshdesk is being used by over 28,000 paying customers, 600K agents processing over 6M+ conversations a day. Our enterprise customers include Sling, Netflix, Bridgestone etc.. A MM company would typically be a tiny fish in a large pond for Salesforce, so engagement with them would be minimal. For Freshworks, a company in the MM space is a big fish in a small pond and that comes with the advantages of us being specifically invested in your success.

Why we win

- **A unified 360° approach:** Natively built products that offer better agent and admin experience to manage all channels under one-roof, with powerful Omnichannel capabilities. Intuitive UI that makes it easy for agents and admins to use, improving overall adoption and data hygiene.
- **Build and Maintain bots faster and easier:** Freddy AI is trained on holistic data gathered at every touchpoint. The insights are immediate and actionable. Freddy's Bot builder provides a visual canvas that's easier to build and maintain your bots. No need for data scientists or SI partners, build on your own and get started quicker.
- Freddy can perform multiple actions at the end of a bot flow - **transferring to an agent for live conversations.** Freddy provides a transcript of the bot conversation so that agents have context and begin where the bot left off.
- **Intuitive and user-friendly UI:** Agents get a consolidated view of customer interaction history from multiple channels in one place avoiding them from toggling between screens and different tools. Enabling them to deliver contextual support, quicker responses and faster resolutions.
- **Out-of-the-box solutions:** Starting from ticket assignment, automations, reporting, analytics and sandbox, features in Freshdesk make it easier for an admin to set-up and scale. Ticket views, Omnichannel timeline etc., makes agents' lives easier to support customers with context, fast.
- **Lower TCO, faster time-to-value:** Migrate your data to Freshdesk without any hassle. Transparent pricing and straightforward contracts, & free support on all plans

Proof points

- Compared to Salesforce, agents can work 5x faster to do handle, respond and resolve tickets on Freshdesk. Save 120 clicks and as much as 1.2 hours a day in routine tasks with time-saving features like thank you detector, ticket summary, and quick actions. Agents save about 1.2 hours in menial tasks and response times reduce by an hour.
- Our bots routinely deflect from 40% & 80% queries for customers (Grofers, Cred, PhonePe, etc.) Freddy was built and deployed to perform COVID-19 screening for multiple hospital and governments in less than a week.
- Agents on Freshdesk get up to speed 3x faster and make 121 less clicks per day using features like thank you detector, summary app, quick actions etc.
- Faster change management via solutions like sandbox auto-sync, assignment rules that save an admin's time in change management

Discovery questions

Agent Productivity:

- How long does it take for a new agent to onboard and get upto speed? What are the costs incurred?
- How easy is it to integrate different messaging channels with ServiceNow CSM ?

Workflows & Customisations:

- Do you rely on external product experts to curate reports, customise, Automate your workflows?

Pricing:

- Are you willing to spend around \$12,000 - \$20,000/year for their support partners to get L1 to L3 support ?
- Do you allocate a sizeable budget for migration/ implementation and resources for building apps?
- Does your running costs increase every year?

Audience

Identifying Rip & Replace Accounts:

- Don't feel well-served by ServiceNow CSM and are open to change.
- Annual renewal coming up.

Persona: Budget Holder or Executive

Segment: Mid-market (250+)

Region: Global

Customer wins against Servicenow

Walt Disney : 500+ Automations for complex HR and Payroll workflows as well as custom apps that integrate with in-house tools

Euronext : Unified email, chat and calls into a single interface. Euronext prefers Freshdesk Omnichannel Suite because of the quick agent onboarding due to intuitive UI, scalability and out-of-the-box automations and reporting.

ServiceNow CSM challenges

- **Workflow based Ticketing:** ServiceNow CSM follows ITSM styled workflow based ticketing system is not very agile to handle Omnichannel support use cases effectively.
- **Long on-boarding period:** Training and onboarding agents takes months rather than weeks because of their product complexity.
- **Consultant Dependency:** Implementation and customisation requires hiring a ServiceNow expert throughout the product lifespan, bringing in huge costs.
- ChatBots response is based only on the options selected by the user. Also, their Chatbot is not intelligent enough to handoff complex conversation to Live Agent only when the user opts for an agent.
- **Marketplace Apps:** V e.
- **Poor Search Algorithm:** Search feature in ServiceNow is a huge customer pain point. This dents agent's productivity.

ServiceNow CSM FUD against us

- Freshdesk is for SMB, cannot scale and do not have global implementation partners.

Rebuttal: Freshdesk is being used by over 28,000 paying customers, 600K agents processing over 6M+ conversations a day. Our enterprise customers include Sling, Netflix, Bridgestone etc,. A MM company would typically be a tiny fish in a large pond for Salesforce, so engagement with them would be minimal. For Freshworks, a company in the MM space is a big fish in a small pond and that comes with the advantages of us being specifically invested in your success.

- Our data is too large to migrate to Freshdesk

Rebuttal: Freshdesk has a track record of migrating business in less than 4 weeks. We onboarded Sling who switched from SFDC with over 6,500+ agents. We migrated 2.6M contacts, 1M tickets; ensured their SEO (KB) was not impacted.

Freshdesk Omnichannel value - Why we win

- Freshworks remains the first **truly omnichannel customer engagement platform**. Unlike ServiceNow CSM, It consolidated reporting dashboards, CSAT, Business hours, agent groups across channels to give a unified view for admins.
- Freddy AI is easy to configure, deploy and maintain without depending on developers. Provides direct answers, not article recommendations. Easily consumable AI that companies are able to see very quick acceleration in agent efficiency.
- Admins have complete control over the entire ticket lifecycle, with specific reports on minor metrics to track the status of the ticket. Mirror workflows with custom statuses at every step towards resolution.
- Freshworks' platform is built on AWS lambda. With over 1000+ marketplace apps that work out-of-the-box and a serverless architecture, businesses spend 25% less on building apps.
- Extensive search capabilities and powerful filters that help agents find all relevant customer information in a unified interface.

Freshdesk Omnichannel Suite - Proof points

- Save 120 clicks and as much as 1.2 hours a day in routine tasks with time-saving features like thank you detector, ticket summary, and quick actions.
- Our bots routinely deflect from 40% & 80% queries for customers (Grofers, Cred, PhonePe, etc.) Freddy was built and deployed to perform COVID-19 screening for multiple hospital and governments in less than a week.

- Don't feel well-served by SAP Service Cloud and are open to change.
- Annual renewal coming up.

Persona: Budget Holder or Executive

Segment: Mid-market (501+)

Region: Global

SAP Service Cloud challenges

- **Poor External App Integrations:** Integrations with external apps are very strenuous and has high consultant dependency and costs.
- **Incomplete Feature-Set:** Many important and necessary features are underdeveloped. Also, some features like CSAT are missing making the overall product fall short.
- **Slow Product Updates:** Product updates and feature requests take a long time to be addressed leading to customer frustration.
- **Poor Product support:** Long resolution time for addressing the customer support queries and issues.

SAP Service Cloud FUD against us

- Our data is too large to migrate to Freshdesk

Rebuttal: We have a track record of completing implementations at a scale that involve 1,000+ agents within 2-4 weeks. We onboarded Sling who switched from SFDC with over 6,500+ agents, migrating 2.6M contacts and 1M tickets.

- Freshdesk is for SMB, cannot scale and do not have global partners.

Discovery questions

Time to value & Productivity

- How long does it take for new agents to get onboarded to MSD and get up to speed?
- Does your agents complain about lagging issues, bugs and poor user interface?

Implementation & Customizations:

- Do you rely on third party vendors for implementation and to customise your workflows?
- How challenging is it to make changes to your automations and workflows?

Scalability:

- Would you like to stick to the same vendor even as your team scales?
- Does your support team ever need to work with a different team in order to help your customers?

Pricing:

- Does your running costs increase every year? Do you pay a hefty amount when you add new agents or get upgrades?

Audience

Identifying Rip & Replace Accounts:

- Been with MSD several years and fatigued by upgrade costs and lack of technical as well as account support.
- Don't feel well-served by MSD and are open to change.
- Annual renewal coming up.

Persona: Budget Holder or Executive

Segment: Mid-market (250+)

Region: Global

Pricing

- **Plans:** Professional \$50/user/month; Enterprise \$95/user/month
- **Add-ons:** Digital messaging add-in \$75/user/month; Chat add-in \$60/user/month, both requires Enterprise license
- **More add-ons:** Virtual Assist(Bot) \$1000/month for 2000 sessions; Customer Insights \$1500/tenant/month; Remote Assist \$65/user/month

Microsoft Dynamics 365 challenges

- **Essential features are all add-ons:** Digital Messaging, Chat, Chatbots, Reporting are all paid add-ons, not built-in.
- **Delayed time-to-value:** Implementation takes months and requires hiring an expensive MVP partner.
- **360 degree view not OOTB:** You get a shell product and keep adding disparate layers to it. Lead capture, web/app tracking, lead enrichment etc., has dependency on developers.
- **Heavy dependencies:** No proper support documentation, agent on-boarding takes longer and incur additional costs for training.
- **Limitations/Non-transparent pricing:** Limited seats, licensing, storage, roll up fields, etc., Requires constant upgrades at additional costs.
- **Poor usability, productivity:** Poor, slow UX. Interface lags a lot. Lack of productivity tools.

Microsoft Dynamics 365 FUD against us

- Not a well-known brand unlike Microsoft. Freshdesk is an SMB only solution, with no large references outside India
- Dynamics is highly customizable to suit your business use case with 3rd party extensions, consultation and development network to tailor platform. Has extensive implementation partners.

Rebuttal: Freshdesk is being used by over 28,000 paying customers, 600K agents processing over 6M+ conversations a day. Our enterprise customers include Sling, Netflix, Bridgestone etc., A MM company would typically be a tiny fish in a large pond for Salesforce, so engagement with them would be minimal. For Freshworks, a company in the MM space is a big fish in a small pond and that comes with the advantages of us being specifically invested in your success.

- Freshworks can't scale or grow with you

Rebuttal: Freshworks is ranked **#1 in the Gartner Peer insights reports**, getting the customer choice distinction. Gartner Peer reviews are driven by organizations' specific experiences relative to their unique needs. Freshworks is the **only player in Gartner's Visionary quadrant**. Gartner says, "Midsize & enterprise organizations focusing on innovation for customer engagements and looking for a customer-for-life vision should consider Freshworks."

Freshworks value - Why we win

- **Power of One:** Freshdesk is a one-stop solution. No juggling between tools. Essential features are built-in.
- **Faster time to value:** Faster and successful implementation cycles, migration, and onboarding support. A unified solution alleviates the need for multiple tools, apps, and dependency on third party developers
- **360 degree view, OOTB:** Engage across different channels, including emails, phone, chat, and SMS with Freshdesk. Have meaningful conversations with complete context with a 360° customer view on a single screen from one solution.
- **Freddy AI** is trained on holistic data gathered at every touchpoint. The insights are immediate and actionable. No integrations needed.
- Automations and workflows + AI that reduce manual work and increase time spent on support
- **Modern UI:** Freshdesk has a refreshing UI which is intuitive and easy-to-use. This improves overall adoption and productivity.
- **VFM pricing:** Transparent pricing, straightforward contracts, and free support on all plans

Freshdesk Omnichannel Suite proof points

- Save 120 clicks and as much as 1.2 hours a day in routine tasks with time-saving features like thank you detector, ticket summary, and quick actions.
- Our bots routinely deflect from 40% & 80% queries for customers (Grofers, Cred, PhonePe, etc.) Freddy was built and deployed to perform COVID-19 screening for multiple hospital and governments in less than a week.
- Agents on Freshdesk get up to speed 3x faster and make 121 less clicks per day using features like thank you detector, summary app, quick actions etc.
- Faster change management via solutions like sandbox auto-sync, assignment rules that save an admin's time in change management
- With our multi-level logical operators, you can easily automate complex workflows with a single rule. Reduces dependency on third party developers and increases time to value.
