Focus areas

- Ticket Management
- User Management
- Customer Portal - KBase - Community Forums
- SLA & Reports
- Automations
- Apps

Ticket Management

- *Freshdesk does what Zoho Desk does, but in a more effective way.*

How Freshdesk is better?

1. Bulk Actions and Scenario automations - Available from the ticket list page - agent lives get more easier.
2. ML features - NBA and Customer Sentiment Predictor - Muscle power!
3. Outbound email - Agents initiated conversations
4. Time tracking - Can start off a timer
5. CSAT - Custom surveys
6. Gamification - More engagement, more productivity.
7. Phone Channel - Need not have a Twilio account prior to evaluation, unlike in Zoho Desk.

How Zoho Desk is better?

1. Better UI - Ticket details page
2. Work Modes - Status/Handshake/Countdown
3. SMS Notification to Agents
4. Task Management - Adding time-based tasks and assigning ownership

User Management

- ***Zoho Desk is more “CRM friendly” (Companies = Accounts). Freshdesk caters more towards customer support.***

How Freshdesk is better?

1. One Contact, multiple companies.
2. One Contact, multiple email addresses (More than two).

How Zoho Desk is better?

1. Advanced filtering - OR/AND conditions with default/custom fields.
2. More field types - “Multiselect dropdown”
3. “Follow” Contacts/Accounts.
4. Contract Management & SLA - Define the level of service offered to an account for a specific time period.
5. Custom Dashboard for Agents - Providing the option to pick the appropriate tables/modules.

Customer Portal - KBase - Forums

- *Can be tightly integrated with customer websites*

How Freshdesk is better?

1. Greater customizability - HTML/CSS/JavaScript editor divided per section. Also, access to theme gallery.
2. IP Whitelisting
3. SAML based authentication

How Zoho Desk is better?

1. Insights - KBase and Forums - Shows the most searched articles/posts for the past week/month/year; number of articles used in tickets to respond to customers.
2. SSL Certificate - Costs \$40/portal/year.

SLA & Reports

- *Zoho Desk gives you the data. Freshdesk gives you the decisions you're going after.*

How Freshdesk is better?

1. SLA - Respond Within AND Resolve within - Zoho Desk Takes only “resolution time” into consideration.
2. Business hours - Holiday calendars can be imported.
3. Reports - Analyse trends for a CUSTOM time range.

How Zoho Desk is better?

1. SLA - Triggered when a ticket is either created/updated. Also takes custom fields into consideration.
2. Reports - Better way of “exporting” data - Advanced filters using AND/OR condition; Defining the export layout.

Automations

- *Zoho Desk involves a number of configuration steps to make things simple, Freshdesk makes it simple to configure those too.*

How Freshdesk is better?

1. No Limit on the number of Automation Rules.
2. Webhooks to push information to third party apps based on ticket creation/updation.

How Zoho Desk is better?

1. Flexibility - AND/OR rules for each condition.

App Integrations

- *“Android v/s iOS” all over. Freshdesk solves more use-cases than Zoho Desk.*

How Freshdesk is better?

1. Integrates with over 100+ apps.

How Zoho Desk is better?

1. Tighter integration with Zoho suite of products like: Zoho CRM, Zoho Survey, Zoho Projects etc.

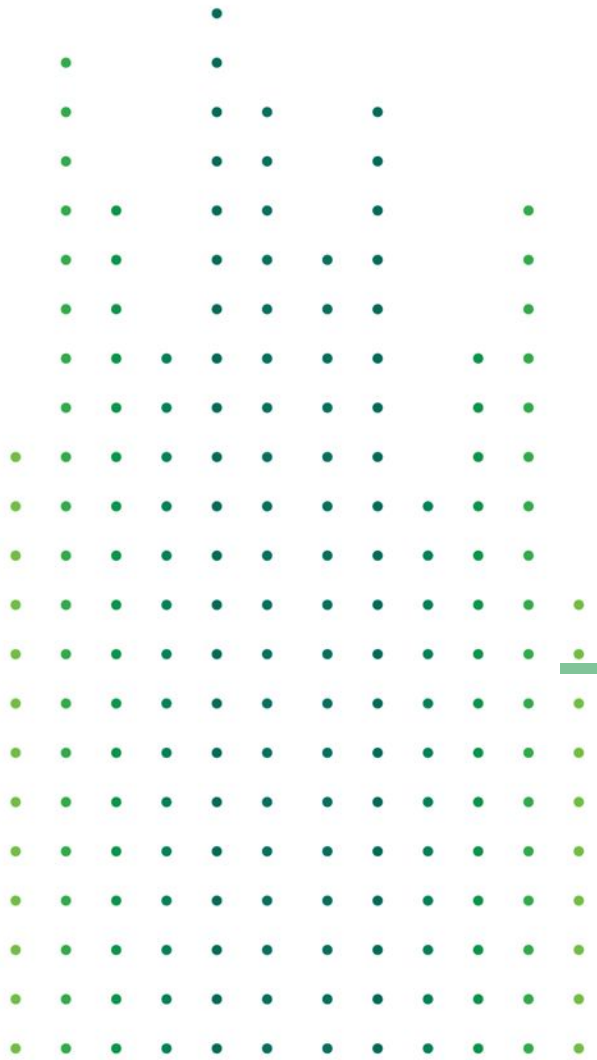

Break-down Analysis

Cheat Sheet for Sales/Pre-Sales teams

- **Channels** - Freshdesk has a separate E-commerce channel and in-app chat support through “Hotline”.
- **Reporting** - Freshdesk guides you to faster decision-making. Zoho Desk gives you raw data.
- **Adaptability** - Zoho Desk is more CRM friendly, Zoho CRM in particular. Doesn't solve use-cases of an E-commerce business or an MSP.
- **Maturity** - Been in the helpdesk software market for 7 years and with 100,000 customers of all sizes. Hence, more App integrations with the best tools like Salesforce, JIRA and not Zoho CRM or Zoho BugTracker.
- **Simple** - Freshdesk is easy to configure and “light weight”. Get things done with minimum clicks.

Thank you!
